

A Pond Filter That Can Take the Pressure and Deliver Results

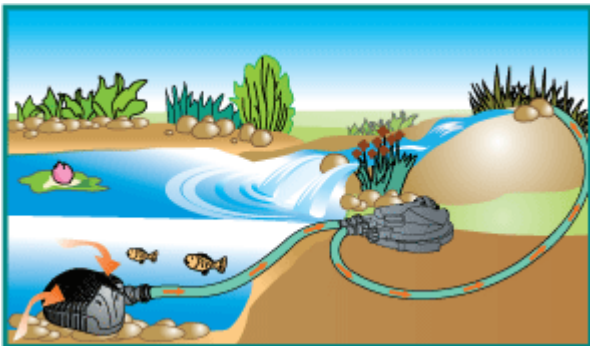

A garden pond is a place to relax, unwind and enjoy nature. To keep your garden pond looking beautiful you require reliable and effective filter technology. Pond One has developed ClariTec, a pond filter that requires minimal maintenance effort whilst delivering astonishing filter results to give you more time to enjoy your pond.

Key Features of the Claritec Pressure Filter

- Solid Construction
- Deep Cleaning Power
- Greater Filter Volume
- Available with or without UVC
- Retrofit UV can be added later
- Available in Sets with StingRay Pumps
- Includes CeramiSub Advanced Filter Media
- Supplied with all Hose Connections
- 10m cable for the UVC for easier installation
- Remote UVC ballast unit
- Available in 2 sizes
- 2 + 1 year Guarantee

Claritec For Cleaner Ponds

Solid construction

ClariTec from Pond One is a pressurised pond filter with a real feel of quality. The Construction is solid and the media content is convincing. Designed to withstand pressures of up to 0.5 bar the ClariTec can be hidden in the ground beside the pond and then return the filtered pond water back via a waterfall perhaps.

Extra space for more filter media

As with any filter the true test is the mechanical and biological effectiveness. ClariTec does not disappoint in this respect. With on average a larger canister volume than many other brands for similar flow rates, this additional space allows up to pack in more media surface area, the combination of up to 4 grades of high quality foram pads and our unique SUPER BIO CHAMBER which is home to the 'CeramiSub' substrate. The biological and nitrification qualities are in our opinion unrivalled on the market.

Remote ballast unit

Another advantage over many other pressurised filters is the UVC ballast being remote from the filter unit. With 10 meters of cable from the filter to the weather proof ballast, installation possibilities are therefore far wider, like in the garage for instance and reduce the likelihood of electrical breakdown often due to moisture ingress onto the ballast contact over a period of time. This also allows it to be exchanged in the unlikely event of failure unlike most other brands where the whole filter can become a disposable item in the event of ballast failing.

Filter Maintenance at the Flick of a Switch

The integrated back flow system can be activated by the control dial. This reverses the flow and washes out most sediment and debris which has built up over time. A hose pipe can be connected to the 'waste' outlet to take the dirt away from the filter to the drain or the garden. The big advantage of this type of cleaning is that the "kill" off of beneficial bacteria during the cleaning process is significantly reduced since you do not have to remove the filter media. This level of cleaning is all that is normally required. Occasionally more thorough cleaning will become necessary. Simply flick the safety catch on the sealing clamp and the chunky release mechanism can be opened. The filter head can then be removed and the media washed out.

Your Guide to Sizing Claritec Filters to Your Requirements

Claritec Filter Model	Max Pond Size Suggested		
	Stock Level 1	Stock Level 2	Stock Level 3
3000	3000	1500	750
5000	5000	2500	1250

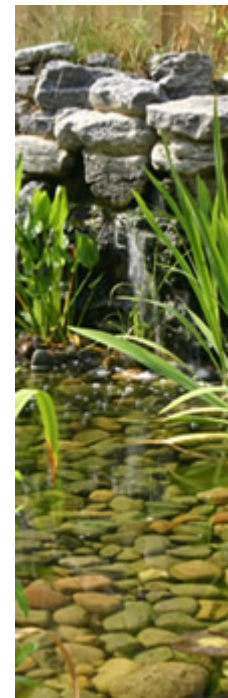

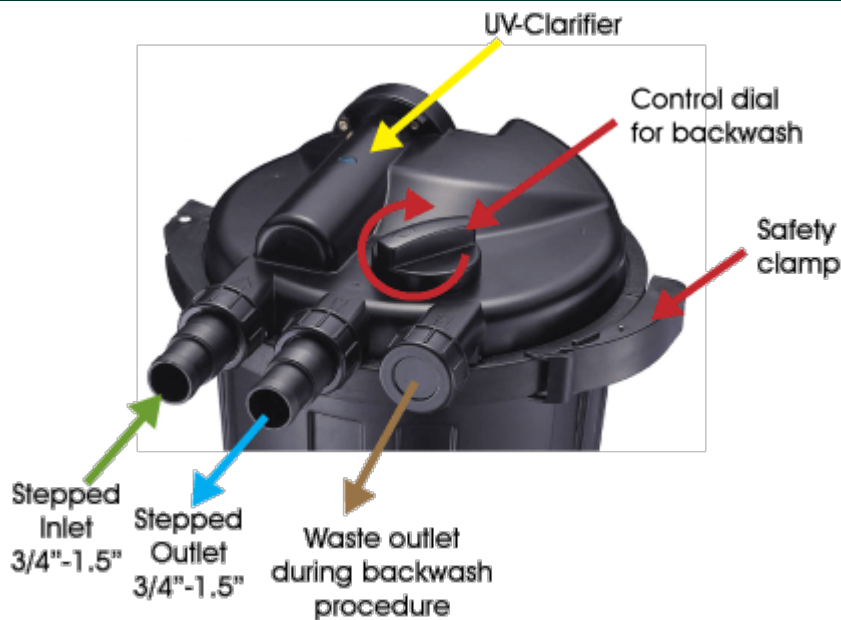

Stock Level 1: Ornamental pond with plants and few fish and less than average (6 hours) exposure to full sunlight per day

Stock Level 2: Typical pond with plants and average fish contents and average sun exposure

Stock Level 3: Heavily stocked pond with plants and larger fish or greater than average sun exposure.

Technical Specifications

Model	Height	Diameter	Volume	UVC	Fittings	Cable Length
3000UV	360mm	330mm	16.5L	9W	3/4"-1.5"	10m
5000UV	460mm	330mm	21.5L	9W	3/4"-1.5"	10m
10000UV	560mm	330mm	27.5L	13W	3/4"-1.5"	10m
15000UV	660mm	330mm	33.5L	13W	3/4"-1.5"	10m

Claritec Complete Sets

The ClariTec Filters are also available as complete sets with a StingRay filter pump to give you ultimate peace of mind that you have purchased the right combination to achieve beautiful clear

water in your pond.
